

keen interest in sign language. She is absolutely committed to her students, getting to know them outside of school and treating them as members of her family. She works constantly to provide her students with better communication skills and confidence in themselves. She is a tremendous contributor to her community and to her students, and I am honored to have the chance to recognize her here today.

#### INTRODUCTION OF THE SPORTSMANSHIP IN HUNTING ACT

#### HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 19, 2005*

Mr. FARR. Mr. Speaker, today I, along with Representative CHRIS SHAYS and 17 other members, introduced the Sportsmanship in Hunting Act of 2005. This bill, similar to a bill I introduced last congress, gets at an issue that many would be surprised to learn even occurs: the "hunting" of an animal inside an enclosed area, a fence. By halting the interstate shipment of captive exotic mammals for the purpose of being shot in a fenced enclosure for entertainment or for trophy, the bill we introduced today will lead to significant reductions in "canned hunt" operations.

At more than 1,000 of these commercial "canned hunt" operations around the country, trophy hunters pay a fee to shoot captive exotic mammals—animals that have often lived their lives being fed by hand and thus have no fear of humans. Simply stated, there could be no easier target. Canned hunting ranches know this and can therefore offer guaranteed trophies, touting a "No Kill, No Pay" policy.

Who supports canned hunt operations? Not rank-and-file hunters. In fact, in a poll of their readership described in the July 2003 issue, the editors of Field and Stream magazine reported that 65 percent of sportsmen oppose canned hunts. Additionally, lifelong hunters in Montana, including members of the Montana Bowhunters Association, spearheaded a state ballot initiative in 2000 that led to a ban on shooting animals in fenced enclosures. In addition to Montana, 23 states have full or partial bans on canned hunts for mammals. The momentum to address canned hunt operations is no surprise given that an element of hunting that so many sportsmen hold dear, that of the "fair chase," is absolutely absent under canned hunt conditions. The time is long overdue for the federal government to participate in efforts to end this despicable practice.

By halting the interstate transport of non-indigenous mammals used in canned hunts, the Sportsmanship in Hunting Act will curb a practice so egregious that hunters and animal advocates alike view it as unfair and inhumane. This bill is supported by numerous local and national groups representing more than ten million Americans.

Mr. Speaker, in closing, I encourage my colleagues to join me in putting a lid on canned hunts.

#### REMEMBERING THE LIFE OF DR. SAMUEL PROCTOR MASSIE

#### HON. ALCEE L. HASTINGS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 19, 2005*

Mr. HASTINGS of Florida. Mr. Speaker, I rise today to commend the outstanding life of Dr. Samuel P. Massie, who passed away at the age of 85 on April 10, 2005.

Dr. Massie, a chemistry professor, was the first African American to teach at the U.S. Naval Academy in Annapolis, Maryland.

As a young graduate student, Dr. Massie worked on the Manhattan Project where he and other scientists made liquid compounds of Uranium for the making of an atomic bomb. He also conducted pioneering silicon chemistry research and investigated antibacterial agents. Dr. Massie held the patent for chemical agents effective in battling gonorrhea. Additionally, he received awards for research in combating malaria and meningitis, worked on drugs to fight herpes and cancer and developed protective foams against nerve gases.

Dr. Massie was a former professor at several historically black colleges including my alma mater, Fisk University. Dr. Massie was instrumental in encouraging African American and other minority students to pursue science careers.

Samuel Proctor Massie Jr. was born in North Little Rock, Arkansas, the son of two schoolteachers. It is purported that he could read at a third grade level by the time he entered the first grade. He graduated high school at the age of 13 and went on to graduate Summa Cum Laude in chemistry from Arkansas Agricultural, Mechanical and Normal College (now the University of Arkansas at Pine Bluff) in 1936. He then received a Master's degree in Chemistry from Fisk University in 1940.

I met Dr. Massie when I was a student at Fisk University, where he was teaching physical chemistry. It was an extremely difficult class and as a boy who had received an education in the rural, segregated south, all of this was unfamiliar territory. I was failing his class and Dr. Massie came to me and said, "Young man, you're going to fail this class, sign this card and drop the class." I did, and Dr. Massie credits himself as the reason I became a lawyer.

Dr. Massie was a remarkable chemist, academician, and friend. His accomplishments are too many to mention and the lives he's impacted too numerous to count. He will forever be remembered for his character and his extraordinary work.

#### HONORING THE CONTRIBUTIONS OF GAYLE RHOADES, SAN MARCOS HIGH SCHOOL TEACHER OF THE YEAR

#### HON. HENRY CUELLAR

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 19, 2005*

Mr. CUELLAR. Mr. Speaker, I rise to recognize the countless contributions of Gayle Rhoades, San Marcos High School Teacher of the Year.

Gayle Rhoades has a Bachelor of Science degree from Mississippi State University. She has been teaching Academic Biology and Pre-AP Biology at San Marcos High School for the past four years. She combines tough discipline and dedication to helping individual students into an effective teaching strategy.

Ms. Rhoades has recently proved herself in one of her school's toughest assignments, as a teacher in the PASS program. PASS is a program for second and third year freshman repeaters. Many of the students in the program have persistent attendance and discipline problems, and are resistant to authority and advice. Ms. Rhoades has dealt with these students with firmness and patience, and her efforts have paid off. Many of her students credit her with putting them on a path to graduation and success in the face of considerable odds.

Ms. Gayle Rhoades has been a tremendous role model and source of support for her students, and an excellent resource for her school system and community. She has taken up challenging assignments without complaint, and changed numerous lives for the better. She represents the best of our public education system, and I am proud to have the opportunity to recognize her here.

#### DEATH TAX REPEAL PERMANENCY ACT OF 2005

SPEECH OF

#### HON. TODD TIAHRT

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 13, 2005*

Mr. TIAHRT. Mr. Speaker, I rise today in strong support of H.R. 8, the Death Tax Repeal Permanency Act of 2005. This bill would put an end to the estate tax, commonly referred to as the death tax.

My only disappointment in voting to eliminate the death tax this year is that we must again wait for the Senate to follow suit. The House has already voted to permanently repeal this tax in both the 107th Congress and the 108th Congress. Unfortunately, the Senate has not been able to pass this permanent repeal.

I am very pleased, however, that the House has once again listened to the people and will try to nail the coffin shut on the death tax. Asking families to pay taxes on what is left behind when a loved one dies is simply not the right way for a government to collect taxes.

Throughout our history, Americans have worked vigorously to achieve great success despite extraordinary hardships. Farmers have tilled the earth, inventors have exercised their ingenuity, builders have constructed, entrepreneurs have established businesses, and in the process of becoming successful, wealth is created. When a person successfully pursues a dream and wisely manages resources over a lifetime, the federal government should not reward those accomplishments by seizing a significant portion of what he intended to pass along to the family.

As is often the case, family farmers or small business owners make plans to pass the family business to their children after they die. Unfortunately, due to burdensome death taxes, there are countless examples of families who have been forced to sell the business or purchase it back from the government.
